Ohh boy!

I've been figuring out why the HUD hack didn't work on real hardware, it turns out that the game stores the hud values in differen addresses depending on the language you have set your console, I have demul set to english, and my console to spanish so that is what it wasn't working lol.

Tons of ours wasted....

So I made the hack with english setup in mind. you must set your console to english in orther to make the HUD hack work. everything else will work no matter what language is selected.

Prepare yourself to spend quite a lot of time introducing codes in Action replay :eek:

WIDESCREEN" HUD

Code:  
02484F18  
42400000  
02484D5C  
42C00000  
02484C98

02484BF8  
42C00000  
02484B38  
42C00000  
02484AD8  
43400000  
02484A98  
42C00000

NO OVERLAPING HUD-PARTIALLY DISABLED + WS HUD.

Code:  
02484F18  
42400000  
02484D5C  
00000000  
02484C98

43400000  
02484A98  
42C00000  
02484D7C  
00000000

PS2-LIKE CAMERA.

Code:  
2C1F2814  
02010000  
2C1F27DC  
3FC00000  
2C1F27E0  
40B4CCCD  
2C1F27FC  
2AF80000  
2C1F27F8  
000001F4

CAMERA 1 (I recommend this one it has wider fov and gives better sense of speed compared to the default rear camera they added to the ps2 version + you can see your rivals comming, not like in the ps2 camera since the car is basically at the bottom of the screen on that one)

Code:  
021F2814  
02010000  
021F27DC  
3FE66666  
021F27E0

**Fighting Vipers 2 (JP) (SEGA Enterprises) (2000) [HDR-0133] [497-4365-50133-4]**

Code: 023D3AF0----43800000[/quote]

**Fighting Vipers 2 v1.001 (2000)(Sega)(PAL)(M5)[!]**

Code: 023D3B10----43700000

**Frame Gride NTSC-J (english translation, should work on the original one too)**

Code: 02586290----3F400000  
Code: 02586260----43F00000

**Fur Fighters v1.003 (2000)(Acclaim)(PAL)(M4)**

16X9  
Code: 0255A354----3FAAAAAB  
The game does have an ingame widescreen option, but as usual it is pretty shitty, it frames the game with huge black bars.

**Fur Fighters v2.001 (2000)(Acclaim)(NTSC)(US)(M4)**

16X9  
Code: 0255A374----3FAAAAAB
